

# Organic LONG LIFE

La linea "Organic Long Life", è stata sviluppata con l'obiettivo di creare una pastiglia performante e con un'ottima durata (circa il 40% in più rispetto ad una pastiglia organica standard), offre una frenata potente e modulabile anche ad impianto freddo, sia in condizioni di asciutto che di bagnato. Il compound della mescola a base di resina, garantisce performance elevate fino a 300°C, ed è ideale per i noleggi.

# Sintered POWER

La linea "Sintered", è stata sviluppata per durare ed offrire una frenata potente in tutte le discipline. La miscela metallica prodotta per sinterizzazione, resistendo a temperature superiori ai 700°C garantisce una performance costante in tutto il range di lavoro. Necessita di un buon rodaggio e warm-up, prima di raggiungere il massimo dell'efficienza. Non particolarmente indicata per le condizioni di bagnato.

# Semi Metal PERFORMANCE

La linea "Semi-Metal Performance", è stata sviluppata per offrire il massimo delle performance nelle discipline gravity, dove la resistenza alle alte temperature è indispensabile per evitare che si verifichi il fenomeno di FADING, ovvero la perdita di efficacia dell'impianto frenante. La silenziosissima miscela semi metallica dual carbon, additivata con kevlar e grafite, garantisce una frenata potente e modulabile sempre, sia su asciutto che bagnato, anche ad impianto freddo.

# E-bike CERAMIC

La linea "E-bike Ceramic", nasce per offrire prestazioni elevate ed un'ottima durata in tutti i campi di utilizzo Ebike. Queste pastiglie garantiscono una frenata potente e modulabile anche ad impianto freddo, sia in condizioni di asciutto che bagnato. Grazie allo specifico compound della mescola (con aggiunta di materiale ceramico) e PAD (realizzato con rivestimento ceramico), questa pastiglia é in grado di abbattere il calore trasmesso alla pinza freno, garantendo una costante efficacia e potenza frenante per impieghi gravosi prolungati.
